Birmingham

Quotation reference 9.

Thank you for your valued enquiry. Our prices are as follows.

1 off What is FPDF?

FPDF is a PHP class which allows to generate PDF files with pure PHP, that is to say without using the PDFlib library. F from FPDF stands for Free: you may use it for any kind of usage and modify it to suit your needs.

FPDF has other advantages: high level functions. Here is a list of its main features:

- â€¢Choice of measure unit, page format and margins

- â€¢Page header and footer management

- â€¢Automatic page break

- â€¢Automatic line break and text justification

- â€¢Image support (JPEG, PNG and GIF)

- â€¢Colors

- â€¢Links

- â€¢TrueType, Type1 and encoding support

- â€¢Page compression

FPDF requires no extension (except zlib to activate compression and GD for GIF support). It works with PHP 4 and PHP 5 (the latest version requires at least PHP 4.3.10).

The tutorials will give you a quick start. The complete online documentation is here and download area is there. It is strongly advised to read the FAQ which lists the most common questions and issues.

A script section is available and provides some useful extensions (such as bookmarks, rotations, tables, barcodes...).

price £20.00 each.

2 off US presidential contender Donald Trump's opening monologue on TV comedy show Saturday Night Live was disrupted by a heckler shouting "Racist!"

But the interruption was from comedian Larry David - joking that he wanted to claim the reward offered by a Latino rights group angry at Mr Trump's statements on Mexican immigrants.

price £44.00 each.

We hope this meets with your approval.

Best regards

Gary Gibbs
